**OFFICE ACTION**

**ISSUE/MAILING DATE:** 4/5/2016

**THIS IS A FINAL ACTION.**

This action is in response to the voluntary amendments filed by applicant on March 7 and 23, 2016.

**Procedural History**

**Application and Appeal:** This application was filed on March 27, 2014. The first office action issued on June 18, 2014 and included a requirement for clarification of the identification and classification of the goods. The trademark examining attorney issued a final Office action requiring an acceptable identification and classification of goods on January 10, 2015. On July 20, 2015, applicant responded by filing a notice of appeal to the Trademark Trial and Appeal Board (Board) and a request for reconsideration that contained only a single proposed change, the deletion of the wording "and supports" from "electrical and electronic installation products and accessory components, namely, fittings and supports for fluorescent lighting fixtures" in International Class 11. The request for reconsideration was denied on August 7, 2015. Applicant's brief was filed on October 6, 2015 and the examining attorney's brief was filed on December 4, 2015.

**Remand:** Applicant requested remand on December 30, 2015. On January 4, 2016 the Board suspended the appeal and remanded the application to the trademark examining attorney for consideration of the request. On February 17, 2016 the examining attorney emailed applicant comments on the proposed amended identification of goods in the request for remand. The comments included chart detailing the reasons that certain wording was unacceptable and included examples of acceptable amendments. Applicant responded via email on February 26, 2016 with proposed amendments. On February 29, 2016 the examining attorney again provided applicant with a chart with detailed comments on the proposed amendments, examples of acceptable amendments, and supporting evidence from the online *U.S. Acceptable Identification of Goods and Services Manual* (<http://tess2.uspto.gov/netathtml/tidm.html>) ("ID Manual").

Applicant filed a voluntary amendment on March 7, 2016 incorporating much of the proposed wording that was discussed in the previous email correspondence. On March 23, 2016 the examining attorney again emailed applicant regarding the only outstanding wording, "Non-metal structural building and framing products sold as a system, primarily comprised of non-metal brackets for building, non-metal tubing ends for tubing members, non-metal closure strips for channel members, non-metal ducts, and non-metal door jambs" in International Class 19. The

email included an explanation of why the proposed amendment was not acceptable and another example of an acceptable amendment that attempted to address applicant's evidence regarding the goods. Applicant filed another voluntary amendment on March 28, 2016 with arguments in support of its proposed amendment.

The March 7 and 23, 2016 amendments present new evidence that must be addressed. *See* TBMP §1204; TMEP §715.04(b). Therefore, this new final Office action is being issued to address such new evidence and supersedes the previously-issued final Office action.

### **Clarification of Identification of Goods Required**

The identification requirement is maintained and continues to be final as to the wording “*Non-metal structural building and framing products sold as a system, primarily comprised of...non-metal tubing ends for tubing members, non-metal closure strips for channel members*” in “Non-metal structural building and framing products sold as a system, primarily comprised of non-metal brackets for building, non-metal tubing ends for tubing members, non-metal closure strips for channel members, non-metal ducts, and non-metal door jambs” in International Class 19. *See* TBMP §1204; TMEP §§713.02, 715.04(b). This wording must be clarified because it is too broad and could include goods in other international classes. *See* TMEP §§1402.01, 1402.03. As applicant has been advised in each office action and the numerous emails, this wording could include goods in other classes such as caps in International Class 20 and bands in International Class 22. *See* ID Manual entries for caps and bands attached to the February 29, 2016 outgoing email.

***Non-metal tubing ends for tubing members:*** This wording must be clarified because it is too broad and could include goods in other international classes. *See* TMEP §§1402.01, 1402.03. As applicant has been advised in each office action and the numerous emails, this wording could include goods in other classes such as caps in International Class 20. *See* outgoing emails from February 17, February 29, and March 23, 2016 and ID Manual entries attached to the February 29, 2016 outgoing email. *See* also attached entries from the ID Manual showing that fittings for non-metal flexible pipes and tubes are in International Class 17 and non-metal fittings for rigid pipes are in International Class 20.

Applicant argues this wording is acceptable because the wording “tubing ends” appears in the ID Manual of “metal caps for {indicate use, e.g., tubing ends}” in International Class 6. This entry is distinguishable from applicant's proposed wording. The goods in the ID Manual entry are “metal caps” for a specific use, and “tubing ends” is an example of an acceptable specification of the use of the caps, not as goods themselves. Applicant's wording is not so specific; in contrast it only specifies the goods are “ends” for “tubing members.”

Applicant also argues that “tubing ends” is common commercial name for the goods, however applicant has not provided any evidence of this. Review of the evidence submitted in the March 28, 2016 action in support of this statement shows exactly the opposite – that tubing ends include a wide variety of goods for use in a number of different fields. Applicant's evidence shows tubing ends of metal, plastic and other materials, and as parts for vehicles, shelves, fluid processing, irrigation hoses, and medical tubing:

- Bryke Racing: threaded tubing ends, see attached from <http://www.bryke.com/300-358/Threaded+Tubing+End.html> showing the goods are for vehicle suspensions
- C.R. Laurence Co.: stainless tubing end for a “tray slide shelf,” see attached from <http://www.crlaurence.com> showing these goods are for shelf brackets
- Keyser: the attached from <http://www.keysermanufacturing.com/> shows these goods are racing parts
- Lamb: the attached from <http://www.lambcomponents.com/> shows the goods are auto parts
- AdvantaPure: applicant's evidence describes the goods as “for single-use applications such as sampling or storage” and the attached from <http://www.advantapure.com/advantaflex.htm> shows the goods are for “biopharmaceutical tubing for fluid processing.”
- Bluetorch: applicant's evidence shows these goods are for vehicle roll cages
- The Drip Store: applicant's evidence shows these goods are for irrigation hose ends
- Rehab Mart: applicant's evidence shows flexible tubing for oxygen, the full version of this page (<http://www.rehabmart.com/product/corrugated-aerosol-oxygen-tubing-36863.html>) attached to this action shows the goods referenced are not tubing ends, but rather that the flexible tubing has “easy-fit tubing ends,” and additional evidence from this site (<http://www.rehabmart.com/index-dme.asp>) shows that the goods are medical products.

Applicant's evidence includes a notable lack of examples of the wording “tubing ends” used to describe a type of building and framing product. Thus, this wording is not a common commercial term for building products, and could include items in other classes.

The March 23, 2016 email regarding the voluntary amendment also included a proposed amendment that suggested wording clarifying the type of ends and members that would be appropriate for International Class 19.

***Non-metal closure strips for channel members:*** As set forth in the explanation provided with the February 29, 2016 email, this wording could include items in other classes such as bands in International Class 22. *See* attached entries for “binding” from the ID Manual attached to the

February 29, 2016 office action showing non-metal bands for binding in International Class 22. Further, the nature of the goods described by “strips” and “channel members” is unclear.

The attached evidence shows that closure strips can include items for filling gaps in roofing, strips used to close gaps in building panels, and for decks. See: <http://www.lowes.com> (closure strips for roof panels), <http://aviationbuildingsystem.com/resources/glossary-of-terms-aluminum-coated-steel-anchor-bolts-assembly/glossary-c-column-component-continuous-beam-curtain-wall-covering> (closure strip as “a resilient strip, formed to the contour of ribbed panels and used to close openings created by ribbed panels joining other components”), [http://shop.onduline-usa.com/collections/ondura-tuftex-accessories/product-type\\_closure-strip](http://shop.onduline-usa.com/collections/ondura-tuftex-accessories/product-type_closure-strip) (closure strips for building panels), and <http://www.cordeck.com/metal-deck-products> (decking and closure strips therefor).

“Closure” means “the act of closing or the state of being closed,” and “close” means “To fill or stop up, “to bar access to,” and “to draw or bind together the edges of.” See attached from the online American Heritage Dictionary . Thus, the wording proposed by applicant could include a variety of goods, including strips that join together different types of building materials, and bind together materials, such as those in the International Class 22 entries from the ID Manual.

### **Sample Amended Identification**

Applicant may adopt the following identification, *if accurate*:

International Class 6: Building and framing accessory and installation components all made of metal, namely, nuts, bolts, screws, washers for use as hardware, studs, hinges, springs for use as hardware, spring clips for use as hardware, pipe couplings, pipe clamps, pipe rollers for use as hardware, pipe hangers, fender hooks for use as hardware, conveyor and trolley rollers for use as hardware, clamps, brackets for use as hardware, tubing clips, and conduit and pipe risers; strut-type structural building and framing products, namely, rolled and extruded continuous slot metal channels; sectional metallic building units and couplings, fittings, and connections therefor, adapted to serve as framing and supporting members for temporary and permanent construction of buildings and other structures; metal electrical and electronic installation products and accessory components, namely, cable trays and supports, conduits, bus duct and bus bar supports, cable saddles and supports, bus bar clamps, bus duct connectors, and wiring stud nuts

International Class 9: Electrical and electronic installation products and accessory components, namely, raceways, switch plates, outlets and outlet plates, conduit connection fittings and connectors, outlet box connection fittings, fibre wire retainers in the nature of reels for electrical wire, relay racks for mounting electrical equipment; electricity distribution console assemblies primarily comprised of electricity distribution consoles and also including adjustable framing members adapted to installation of electronic equipment facing members; electrical substation assemblies primarily comprised of electrical power stations and also including adjustable framing members, brackets, and fittings adapted for mounting of electrical insulators

International Class 11: Electrical and electronic installation products and accessory components, namely, fittings for fluorescent lighting fixtures

International Class 17: Building and framing accessory and installation components, namely, rubber washers

International Class 19: Non-metal structural building and framing products sold as a system, primarily comprised of non-metal brackets for building, ***non-metal coupling ends for rigid tubing, non-metal closure strips being parts for covering open sides of framing channel bars***, non-metal ducts, and non-metal door jambs; non-metal building and framing accessory components, namely, pipe couplings and brackets for building, and riser supports for non-insulated conduit and pipe

International Class 20: Non-metal building and framing components, namely, nuts, bolts, screws, hinges, springs for use as hardware, spring clips for use as hardware, pipe clamps, pipe rollers for use as hardware, pipe hangers, fender hooks for use as hardware, conveyor and trolley pulley rollers for use as hardware, clamps, and tubing clips

An applicant may only amend an identification to clarify or limit the goods and/or services, but not to add to or broaden the scope of the goods and/or services. 37 C.F.R. §2.71(a); *see* TMEP §§1402.06 *et seq.*, 1402.07.

For assistance with identifying and classifying goods and services in trademark applications, please see the USPTO’s online searchable *U.S. Acceptable Identification of Goods and Services Manual* at <http://tess2.uspto.gov/netahtml/tidm.html>. *See* TMEP §1402.04.

### **Appeal Resumed**

Upon issuance of this new final Office action, the application will be returned to the Board for resumption of the appeal. *See* TBMP §1204; TMEP §715.04(b). Any further request for the trademark examining attorney to consider this application must be made via a request for remand to the Board, for which good cause must be shown. *See* TBMP §1204; TMEP §715.04(b).

**TO RESPOND TO THIS LETTER:** Go to [http://www.uspto.gov/trademarks/teas/response\\_forms.jsp](http://www.uspto.gov/trademarks/teas/response_forms.jsp). Please wait 48-72 hours from the issue/ mailing date before using the Trademark Electronic Application System (TEAS), to allow for necessary system updates of the application. For *technical* assistance with online forms, e-mail [TEAS@uspto.gov](mailto:TEAS@uspto.gov). For questions about the Office action itself, please contact the assigned trademark examining attorney. **E-mail communications will not be accepted as responses to Office actions; therefore, do not respond to this Office action by e-mail.**

**All informal e-mail communications relevant to this application will be placed in the official application record.**

**WHO MUST SIGN THE RESPONSE:** It must be personally signed by an individual applicant or someone with legal authority to bind an applicant (i.e., a corporate officer, a general partner, all joint applicants). If an applicant is represented by an attorney, the attorney must sign the response.

**PERIODICALLY CHECK THE STATUS OF THE APPLICATION:** To ensure that applicant does not miss crucial deadlines or official notices, check the status of the application every three to four months using the Trademark Status and Document Retrieval (TSDR) system at <http://tsdr.uspto.gov/>. Please keep a copy of the TSDR status screen. If the status shows no change for more than six months, contact the Trademark Assistance Center by e-mail at [TrademarkAssistanceCenter@uspto.gov](mailto:TrademarkAssistanceCenter@uspto.gov) or call 1-800-786-9199. For more information on checking status, see <http://www.uspto.gov/trademarks/process/status/>.

**TO UPDATE CORRESPONDENCE/E-MAIL ADDRESS:** Use the TEAS form at <http://www.uspto.gov/trademarks/teas/correspondence.jsp>.

About Us

Founded by Roger Lamb in 1971, Lamb Components, Inc. has become the acknowledged leader in designing and manufacturing drag racing front suspension components, brake systems, shocks, and related products. In terms of innovation and quality manufacturing, no one can compare to the standards established by Lamb.

It was Lamb that introduced the first MacPherson strut-type front suspension for Pro Stock racing applications debuting the breakthrough design with Bill Jenkins "Grumpy's Toy XI" in 1974. Now, more than four decades later, Lamb Pro Stock struts are used throughout in the NHRA Pro Stock, Pro Mod, and Comp Eliminator categories.

After expanding with their own line of brakes in 1974, Lamb was the first to develop carbon disc brakes for drag racing in 1997.

the first to develop carbon disc brakes for drag racing in 1987. Hailed for their light weight and durability, the Lamb carbon/carbon disc brakes have proven their superiority in performance and possible chute failure.

The driving force behind the success of Lamb Components, Inc. is an uncompromising search for perfection in every step of the design and manufacturing process. Racers purchasing Lamb products can be assured that they are manufactured with the latest technology available.

Lamb opened the 1986 season by moving into a new, enlarged production facility. There, they continue to produce the finest parts available at any price. As drag racing moves forward, the most important technological advances will continue to emanate from Lamb Components, Inc.

Our commitment to racing is reflected in the wide range of innovative and cutting edge products we develop and manufacture for the racing industry. We pride ourselves on looking forward, while continuously upgrading and maintaining our current product lines.

Our spacious location in Coopersville, MI gives us the advantage of housing all of our operations, (Keyser Manufacturing, Keyser's Port City Racing, Integra Shocks and Springs, OMI ATV Products, Keyser's Pro Blend, and Demo Derby Masters), under one roof ... allowing us to increase our efficiency, improve customer service, and ensure that we have ample room to expand. Keyser Manufacturing is housed in a 140,000 square foot building containing our sales, showroom, manufacturing, warehouse, and distribution centers.

Our knowledgeable sales staff is only a phone call away to talk you through the ordering process and answer any questions you may have either on the phone or one-on-one at the sales counter.

We ship products to racers all over the world including Canada, Mexico, The United Kingdom, New Zealand, Australia, Africa, and the Netherlands. We dream it, draw it, build it, test it, and ship it right to your door. We're your total solution race car provider. We warehouse over 100 different brands of racing products.

*From lugnuts to bodies, and 12,000 parts in between, we're Keyser's Port City Racing!*

## Meet The Sales Team!

*For technical advice, walk in or call 1-800-472-2464 to speak with one of our knowledgeable sales team.*

HOURS (Eastern  
Time)

Monday-Thursday:  
8:00am - 5:30pm

Friday: 8:00am -  
5:00pm

Saturday: 9:00am -  
12:00pm

We do more than just race car parts! We are also a full service machine and fabrication shop featuring:

- Excellent welding and sheet metal work
- Custom metal fabrication
- Precise machining
- Mig, tig, and robotic welding
- In-house engineering and design
- Small parts assembly
- Waterjet cutting - CNC machining - Turret stamping
- Rolling and forming - Welding - Development
- Powder Coating - Laser Cutting

We create specialty fabrications for a variety of industries. From concept to full production, and everything in between, we can do that...we're Keyser Manufacturing!

We sell more than just shocks and springs! At Integra, we bring years of racing knowledge to the products we sell and give our customers the inside track on what it takes to improve their racing program. We are at the track with our dyno truck and helpful advice right when you need it. Our constant pledge to keep you on the cutting edge of racing technology is exhibited in the wide range of innovative shocks and springs that we offer.

- IDA shocks
- Remote canister shocks
- Aluminum small body twin tube
- Aluminum mono tube
- Aluminum base valve
- Aluminum single adjustable
- Steel mono tube with Schrader valve
- Steel mono tube Non-Schrader valve
- Steel base valve
- Steel IDA Shocks
- Steel single adjustable
- The Avenger steel monotube
- Steel twin tube rebuildable
- Steel twin tube fixed bearing non-rebuildable
- MX springs
- Standard coil over springs
- Conventional front and rear springs
- Full line of shock and spring accessories

12:00pm

Why not choose the shock and spring manufacturer that has produced countless winners and champions year after year? Integra Shocks and Springs!

OMI specializes in quality aftermarket ATV parts and accessories. ATVs are designed to be tough, but even the best made ride occasionally needs routine maintenance, an upgrade or a replacement part. OMI offers a great selection of products created to keep up with those hard driving off-road track or trail adventures.

- Handlebars, grips and risers
- A-Arm sets (Honda and Yamaha)
- Clutches & clutch covers
- ATV tie rods and tie rod ends (Honda & Yamaha)
- Steering stems and stem mounts

For aftermarket ATV parts and accessories shop ... OMI ATV Products!

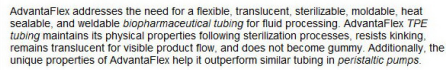

Established in 1981, Pro-Blend provides lubricating and cooling products to circle track, drag racing, motorcycles, marine, machine shop, industrial and outdoor power equipment. Anything that has moving metal parts, we can make run better, faster, cooler.

Demo Derby Masters is the premier destination for demolition derby drivers and car builders. We offer a wide array of stock demolition derby parts and accessories. We also provide custom fabrication and design services to turn your ideas into reality. Our team of engineers and demo derby drivers have designed, manufactured and "derby tested" all parts to insure quality and durability, even under the most extreme conditions. Our parts are manufactured, housed, and shipped out of our 140,000 square foot facility located in Coopersville, Michigan.

### Sterile Weldable, Heat Sealable Bioprocess Tubing

- Excellent life in peristaltic pumps
- [Sterile weldable](#) and [heat sealable](#)
- Now available as leak-proof [molded connections](#) and tubing
- Made from FDA-approved ingredients
- Certified free of silicone oils and [animal-derived ingredients](#)
- Sterilizable by autoclave or gamma radiation
- Available with [validated sterility assurance of 10<sup>-6</sup> via gamma irradiation per ISO 11137 method Dmx 25](#)
- Meets various ISO and USP standards, including Class VI
- Meets European Pharmacopoeia 3.2.2.1 standards
- REACH, RoHS and California Proposition 65 compliant
- Excellent low absorption and adsorption characteristics as compared to silicone
- Low permeability as compared to silicone
- Smooth interior for excellent flow and performance
- Translucent for fluid flow visibility
- Excellent tubing component for single-use systems
- Sizes from 1/8" ( 125) through 1" (1 000) I.D.
- Custom lengths, sizes, and packaging available
- Sealed in polybags at manufacture for cleanliness
- Documented quality control, lot traceable with identification on polybags
- Single resin validation – no need to graft to other tubing materials like silicone for media filling and sampling applications that involve peristaltic pumps; helps eliminate operator errors
- "Extractables" test portfolio available

**AdvantaTube®  
STERILE WELDER**

- [CADD \(Classified Additive Data\) for AdvantaFlex](#)
- AdvantaFlex has a Master File with the U.S. Food and Drug Administration (#28810)
- [Complete validation package available upon request](#)

**There is a <sup>better</sup> alternative**  
 Discover how much better the right tubing — AdvantaFlex — will work in your pharmaceutical, biotech, medical, or other critical processing application.

#### APPLICATIONS

- Sterile filling
- Vaccine production
- Pharmaceutical sampling and delivery systems
- Peristaltic pump transfer
- Single-use systems
- Bioreactor processes
- Cell media, harvesting, and fermentation
- Pharmaceutical production and processing
- High purity water transfer
- Filtration

The [AdvantaTube Welder](#) makes sterile tubing welds quickly, reliably, and easily. Developed for biopharmaceutical applications, the AdvantaTube Welder has been designed to optimally work in all AdvantaFlex® TPE tubing applications including wet, dry, or fluid filled tubing. [READ MORE...](#)

#### AdvantaTube® SEALER

Sealing AdvantaFlex® TPE tubing is fast and easy with the [AdvantaTube™ Sealer](#). It offers a compact design, simple operation, reliability, and portability — the remote sealing head uses a 10 foot cable allowing you to seal at

Because of its ability to be sealed and welded, AdvantaFlex is ideal for filling and sampling applications.

AdvantaFlex biopharmaceutical tubing offers excellent life in peristaltic pumps

The data listed throughout this web site is meant only as a guide to aid in design, and is believed to be reliable; however, nothing stated shall constitute a guarantee or warranty for any application. Product field-testing should be performed to find the actual values for a specific application.

L = 50 feet  
K = 100 feet

processing applications. The TPE tubing is overmolded with a USP Class VII polypropylene mini Tri-Clamp to form a smooth fluid path. Available in a variety of tubing sizes and lengths for your biopharma fluid transfer applications.  
[MORE INFO...](#)

[BACK TO TOP](#)

MOLDED ASSEMBLIES AND CONNECTIONS

- Build a complete single use system from AdvantaFlex
- Eliminates the need to splice silicone tubing sections into a process line
- Helps reduce the number of barbed fittings and cable ties needed and their potential for contamination, leaks, and a wasted batch of product
- **AdvantaFlex molded connections** provide a smooth inner surface for even, unrestricted flow
- Choose from T's, Y's, reducers, couplers, crosses, mini and standard Tri-Clamps®
- **BioClosure® container closures** such as GL45 inserts can be molded from AdvantaFlex
- Available with validated sterility assurance of 10<sup>-6</sup> via gamma irradiation per ISO 11137 method VDMax 25
- Excellent weldability and sealability allows leak-free, sterile connections for sampling and storage applications. AdvantaFlex is compatible with all portable welding and heat-sealing equipment

BioClosure System Assemblies

Standardized configurations for media bottles, flasks and carboys using AdvantaFlex Biopharmaceutical Grade TPE tubing and molded components are available.

GAMMA IRRADIATION SERVICES

Have your AdvantaFlex single use system gamma irradiated before it arrives at your location and save the additional inventorying, transportation costs, and transit time.

Bagged and labeled products are picked up from AdvantaPure's facility and conveyed to a local gamma irradiation service provider. Using Cobalt 60 radiation, microorganisms and bacteria are destroyed while your single use system remains in its original packaging. Products are then returned to AdvantaPure for final inspection and shipment to your location.

A number of AdvantaPure's silicone and AdvantaFlex products, particularly those designed for single use, are available with **validated sterility assurance of 10<sup>-6</sup> via gamma irradiation per ISO 11137 method VDMax 25**. Contact us for more information at 1-888-755-4370.

[MORE ABOUT BIOCLOSURE SYSTEM ASSEMBLIES](#)

**Bioreactor Tubing Kits**

The Single-Use kits are custom manufactured and assembled from a variety of components — tubing, filters, connectors — to meet your needs. Made from **platinum-cured silicone** or **AdvantaFlex® biopharmaceutical grade TPE tubing**, AdvantaPure's *Bioreactor Tubing Kits* provide convenience and greater efficiency.

Some compound words  
(like *bus rapid transit*, *dog  
whistle*, or *identity theft*)  
don't appear on the drop-  
down list when you enter  
them into the search  
window. If a compound  
term doesn't appear in the  
drop-down list, try entering  
the term into the search  
window and then hit the  
search button (instead of  
the "enter" key).  
Alternatively, begin  
searches for compound  
terms with a quotation  
mark.

THE USAGE PANEL

The Usage Panel is a  
group of nearly 200  
prominent scholars,  
creative writers, journalists,  
diplomats, and others in  
occupations requiring  
mastery of language. The

14. Warm and humid or stuffy: close weather; a close room.
15. Confined to specific persons or groups: a close secret.
16. Strictly confined or guarded: kept under close custody.
17. Secretive; reticent: was close about her personal life.
18. Giving or spending with reluctance; stingy: He is known to be close with his money.
19. Not easily acquired; scarce: Money was close.
20. Linguistics Pronounced with the tongue near the palate, as the ee in meet. Used of vowels.
21. Marked by more rather than less punctuation, especially commas.

v. (klōz) **closed, clos·ing, clos·es**

v.tr.  

1. To move (a door, for example) so that an opening or passage is covered or obstructed; shut.
2. To bar access to: closed the road for repairs.
3. To fill or stop up: closed the cracks with plaster.

4. To stop the operations of permanently or temporarily: closed down the factory.
5. To make unavailable for use: closed the area to development; closed the database to further changes.
6. To bring to an end, terminate. close a letter; close a bank account.
7. To bring together all the elements or parts of: Management closed ranks and ostracized the troublemaker.
8. To join or unite; bring into contact: close a circuit.
9. To draw or bind together the edges of: close a wound.
10. Sports To modify (one's stance), as in baseball or golf, by turning the body so that the forward shoulder and foot are closer to the intended point of impact with the ball.
11. To complete the final details or negotiations on: close a deal.
12. Archaic To enclose on all sides.

v.intr.

1. To become shut: The door closed quietly.
2. To come to an end; finish: The book closes on a hopeful note.
3. To reach an agreement; come to terms: We close on the house next week.
4. To cease operation: The shop closes at six.
5. To be priced or listed at a specified amount when trading ends: Stocks closed higher on Monday.
6.
  - a. To engage at close quarters: closed with the enemy.
  - b. To draw near: The orbiter closed with the space station in preparation for docking.
7. To come together: My arms closed around the little child.
8. Baseball To finish a game by protecting a lead. Used of relief pitchers.

n. (klōz)

1. The act of closing.
2. A conclusion; a finish: The meeting came to a close.
3. Music The concluding part of a phrase or theme; a cadence.
4. (klōs) An enclosed place, especially land surrounding or beside a cathedral or other building.
5. (klōs) Chiefly British A narrow way or alley.
6. Archaic A fight at close quarters.

adv. (klōs) **closer, closest**

In a close position or manner; closely: stayed close together.

**Phrasal Verbs:**

**close in**

1. To seem to be gathering in on all sides: *The problems closed in.*
2. To advance on a target so as to block escape: *The police closed in on the sniper.*
3. To surround so as to make unusable: *The airport was closed in by fog.*

**close out**

**close out**  
1. To dispose of (a line of merchandise) at reduced prices.  
2. To terminate, as by selling: *close out a business.*

**Idioms:**  
**close the book on**  
To make a final effort regarding (something); bring to a conclusion:  
closed the book on her career with a fine performance.

**close to home/the bone**  
So as to affect one's feelings or interests: Her comment hit close to home.

**close to the wind** Nautical  
At a close angle into the direction from which the wind is blowing:  
sailing close to the wind.

[Middle English *clos*, *closed*, from Old French, from Latin *clausus*, past participle of *claudere*, to close. *V.*, from Middle English *clösen*, from Old French *clorre*, *close-*, from Latin *claudere*.]

**clos**   **a·ble**, **close**   **a·ble** (klō   zə-bəl) *adj.*  
**close**   **ly** *adv.*  
**close**   **ness** *n.*  
**clos**   **ing** (klō   zīng) *n.*

**Synonyms:** **close, immediate, near, proximate**  
These adjectives mean not far from another in space, time, or relationship: an airport close to town; her immediate family; his nearest relative; the proximate neighborhood. See Also *Synonyms at complete.*  
**Antonym:** *far*

**Cantilever Beam**

A beam supported only at one end having a free end and a fixed end.

**Cap Plate**

A plate located at the top of a column or end of a beam for capping the exposed end of the member

**Capacity**

The maximum load (usually stated in tons) which a crane is designed to support.

**Capillary Action**

That action which causes movement of liquids when in contact with two adjacent surfaces such as panel sidelaps.

**Caulk**

See "Sealant".

**Channel, Hot Rolled**

A C-shaped member formed while in a semi-molten state at the steel mill to a shape having standard dimensions and properties.

**Cladding**

The exterior metal roof and wall paneling of a Metal Building System. See also "Components and Cladding".

**Clip**

A plate or angle used to fasten two or more members together.

**Closure Strip**

A resilient strip, formed to the contour of ribbed panels and used to close openings created by ribbed panels joining other components.

### **Cold Forming**

The process of using press brakes or rolling mills to shape steel into desired cross sections at room temperature.

### **Collateral Loads**

The weight of additional permanent materials required by the contract, other than the Building System, such as sprinklers, mechanical and electrical systems, partitions and ceilings.

### **Column**

A main member used in a vertical position on a building to transfer loads from main roof beams, trusses, or rafters to the foundation.

### **Component**

A part used in a Metal Building System. See also "Components and Cladding".

### **Components and Cladding**

For wind load considerations, members that do not qualify as part of a Main Wind Force Resisting System. They include girts, joists, purlins, studs, wall and roof panels, fasteners, end wall columns and end wall rafters of bearing end frames, roof overhang beams, canopy beams, and masonry walls when acting as other than shear walls.

**To:** Unistrut International Corporation ([mhall@kdbfirm.com](mailto:mhall@kdbfirm.com))  
**Subject:** U.S. TRADEMARK APPLICATION NO. 86230383 - U - 1532TUN04168  
**Sent:** 4/5/2016 12:10:37 PM  
**Sent As:** ECOM115@USPTO.GOV  
**Attachments:**

**UNITED STATES PATENT AND TRADEMARK OFFICE (USPTO)**

**IMPORTANT NOTICE REGARDING YOUR  
U.S. TRADEMARK APPLICATION**

USPTO OFFICE ACTION (OFFICIAL LETTER) HAS ISSUED  
ON **4/5/2016** FOR U.S. APPLICATION SERIAL NO. 86230383

Please follow the instructions below:

**(1) TO READ THE LETTER:** Click on this [link](#) or go to <http://tsdr.uspto.gov>, enter the U.S. application serial number, and click on "Documents."

The Office action may not be immediately viewable, to allow for necessary system updates of the application, but will be available within 24 hours of this e-mail notification.

**(2) TIMELY RESPONSE IS REQUIRED:** Please carefully review the Office action to determine (1) how to respond, and (2) the applicable response time period. Your response deadline will be calculated from **4/5/2016** (*or sooner if specified in the Office action*). For information regarding response time periods, see <http://www.uspto.gov/trademarks/process/status/responsetime.jsp>.

**Do NOT hit "Reply" to this e-mail notification, or otherwise e-mail your response** because the USPTO does NOT accept e-mails as responses to Office actions. Instead, the USPTO recommends that you respond online using the Trademark Electronic Application System (TEAS) response form located at [http://www.uspto.gov/trademarks/teas/response\\_forms.jsp](http://www.uspto.gov/trademarks/teas/response_forms.jsp).

**(3) QUESTIONS:** For questions about the contents of the Office action itself, please contact the assigned trademark examining attorney. For *technical* assistance in accessing or viewing the Office action in the Trademark Status and Document Retrieval (TSDR) system, please e-mail [TSDR@uspto.gov](mailto:TSDR@uspto.gov).

**WARNING**

**Failure to file the required response by the applicable response deadline will result in the ABANDONMENT of your application.** For more information regarding abandonment, see <http://www.uspto.gov/trademarks/basics/abandon.jsp>.

**PRIVATE COMPANY SOLICITATIONS REGARDING YOUR APPLICATION:** Private companies **not** associated with the USPTO are using information provided in trademark applications to mail or e-mail trademark-related solicitations. These companies often use names that closely resemble the USPTO and their solicitations may look like an official government document. Many solicitations require that you pay "fees."

Please carefully review all correspondence you receive regarding this application to make sure that you are responding to an official document from the USPTO rather than a private company solicitation. All official USPTO correspondence will be mailed only from the "United States Patent and Trademark Office" in Alexandria, VA; or sent by e-mail from the domain "@uspto.gov." For more information on how to handle private company solicitations, see [http://www.uspto.gov/trademarks/solicitation\\_warnings.jsp](http://www.uspto.gov/trademarks/solicitation_warnings.jsp).
